### Burny Automation 2011 Training Seminars

January 16<sup>th</sup> – 20<sup>th</sup>

May 7<sup>th</sup> – 11<sup>th</sup>

September 17<sup>th</sup> – 21<sup>st</sup>

Burny Automation Training Seminars are designed to provide Technical Service Professionals with the foundation needed to install and support the Burny Automation line of products. This seminar is a combination of classroom and interactive laboratory activities. Hands on exercises are used to assist attendees in the proper installation, setup, and operation of our automation products while, also familiarizing them with the Burny CNC motion software, remote diagnostics, and related Kaliburn plasma products.

#### Key topics covered:

- Product capabilities and differentiation of Burny CNC controls
- Burny CNC software capabilities and navigation
- Motion control theory with live lab exercises
- Installation guidelines for common hardware configurations
- System troubleshooting and diagnostics (onsite & remote)
- **NEW: UltraSharp hole optimization technology**

**Prerequisite:** Attendees should be familiar with the plasma cutting process and have a basic understanding of computers and electrical components.

To enroll or for more information please contact us at:

Phone: 216.524.8800 (ext 2311) or 800.321.8072 (ext 2311)

Email: [burnyservice@itt.com](mailto:burnyservice@itt.com)
